

# CDC Whistleblower Comes Forward: Admits Coverup on Vaccine Link to Autism

Profile of William W. Thompson at [Google Scholar](#)

UPDATE: [Jon Rappoport](#) is reporting: “William W Thompson, PhD...the CDC whistleblower...was escorted off the premises of the CDC campus yesterday afternoon. This is what a source has just told me.”

Someone from Atlanta Georgia on [CNN.com](#) is reporting that Dr. Thompson responded to an email “showing support for his act of speaking out.” So is the mainstream media going to finally cover this story?? (The CNN report has now been removed.)

## Health Impact News Editor

The CDC whistleblower who came forward earlier this week to admit that the CDC had covered up evidence that vaccines are linked to autism has been revealed as Dr. William Thompson. Dr. Thompson was a lead researcher and participant on several studies that were used by the CDC to supposedly prove that vaccines did not cause autism. Here are a few:

- [MMR vaccine and autism: an update of the scientific evidence.](#)
- [Prenatal and infant exposure to thimerosal from vaccines and immunoglobulins and risk of autism](#)
- [MMR vaccination and autism: is there a link?](#)

Dr. Thompson spoke with Dr. Brian Hooker by phone recently, revealing that data withheld from a study conducted on the MMR vaccine revealed that the rate of autism was higher among African American boys:

Dr. Hooker tried for over 10 years to obtain data from the CDC that was suspected of revealing the link between mercury in vaccines and autism. With the help of Congressman Bill Posey, he was [able to obtain](#) much of that data earlier this year, but apparently Dr. Thompson has revealed even more disturbing data concealed by the CDC.

Now that Dr. Thompson has come forward, many questions arise. Will other researchers who participated in this cover-up also come forward, such as Dr. DeStefano? What about directors at the CDC such as current Dr. Coleen Boyle who has testified under oath that no links between vaccines and autism existed? What

about Julie Gerberding who was head of the CDC from 2002 to 2009 before she left to become president of Merck's Vaccine division, a 5 billion dollar a year operation? How many lives have been ruined due to withholding and covering up this information?

While I do not know what the future holds for Dr. Thompson, or how the mainstream media will respond to this story, we will continue to cover this breaking news story.
