

## WHAT IS THE BEST WAY TO DETOXYFIFY THE BODY DURING PREGNANCY?\*

By Vicki Latham P.A.-C.

It is normal when you are pregnant to be concerned about EVERYTHING that you think could affect the health of your baby. The news is full of alarming information on environmental toxicity. And unfortunately most of what you are hearing is true. If you are pregnant now...you can't wait for governments to regulate or corporations/industry to change their practices. You are pregnant **now**, and you need to protect your developing baby from these toxins **NOW!**

**ACTIVE** Detoxification is using things like bathing in detoxifying herbs or minerals, colon cleanses, colonics, other purging methods. Some herbal supplements and specific nutrients can stimulate the kidneys, skin, liver, or bowel to detoxify. Infra-red saunas, hyperbaric treatments, and other technologies rid the body of various toxins. This list is incomplete, but they all have one thing in common: they stimulate the body to release the toxins from where they are stored in the body...usually in fat and bone. They all require the body to **actively do** the work of detoxifying...**BUT WE DO NOT WANT THE BODY DOING THIS KIND OF ACTIVE DETOXIFICATION IN PREGNANCY.** We don't want to stimulate your toxins to be released back into your blood stream, traveling into the fetal circulation.

Clinoptilolite Detoxification is totally unique, and it **works differently** than any of these other things. It is a natural, negatively charged mineral, with a cage like molecular structure. The clinoptilolite goes into the blood stream where it is a "toxin trap"...drawing unto and into itself positively charged bad things...heavy metals, industrial toxins, volatile organic compounds, viral particles in replication, most allergens, even some radioactive particles. You ingest a clean cage, and excrete a dirty one. This is a **PASSIVE DETOXIFICATION** Process. The body has NOTHING to do with it, except to pump the blood around the body and let the clinoptilolite vacuum up the toxins as it travels. It creates **NO stress** for the body; **NO hassle** for you; **NO risks for your baby!**

TO USE: Simply ingest the PURE BODY drops in water, or on food. It is easy, and requires no lifestyle changes. It is safe for everyone, from pregnant women to the elderly. It has FDA GRAS status (generally recognized as safe...the safest rating given a product by the FDA).

The True Miracle: Clinoptilolite is selective; it has no affinity for healthy things like potassium, or calcium. It is not metabolized or stored in the body. 6-8 hours after you take it, it is 100% gone. It only takes out the trash, and you put it into the dump the next time you urinate or have a bowel movement.

When you eat fish, if clinoptilolite is traveling in your blood, any mercury in the fish will be trapped by the cage, and urinated out your next trip to the bathroom. We all have lead stored in our bones, displacing calcium. If a Pregnant woman needs calcium for her baby, will the lead released with the calcium from her bones get into the fetus causing neurotoxicity? It could...or...the lead could be pulled into the cage, reducing neurotoxicity risk. Baby can be healthier and Mom gets the lead out!

Do you see how unique, how safe, how practical, and how totally revolutionary this is? Learn more about **PURE BODY** made by **TOUCHSTONE ESSENTIALS**. [www.toxinclear essentials.com](http://www.toxinclear essentials.com) You can order Pure Body there, too. Please share this revolutionary information with others who need to know. I believe, that is EVERYONE who breaths, eats or drinks on planet Earth, especially now.
